With a lifespan of up to 30,000 hours, LED bulbs outlast their conventional counterparts, making them a cost-effective and sustainable choice for commercial environments. ... The Vulcan 6 is an advanced LED glue board fly killer which comes fitted with 2 x 7w Wemlite LED shatter resistant lamps. This is a new LED fly killer in the range of ...

This paper presents a low-cost electronic board for monitoring and characterizing photovoltaic systems. The designed board is based on the ATmega328 microcontroller of the open-source development platform Arduino. It is composed of four blocks that allow the acquisition of electrical and environmental parameters.
