

2025 Solar Power Scam

Is going solar a scam?

It's likely a scam. While there are some government-funded solar programs for households that qualify, "going solar" isn't free. Honest businesses will tell you exactly how much it'll cost to get and install solar panels. Here's how to steer clear of the scams: Do some research.

Are free solar panels a scam?

Remind prospective customers that while tax credits, rebates, and incentives might be available for solar purchasers who qualify, offers for "free" or "no cost" solar panels are scams. Comply with the law: old and new. Reputable companies know the importance of being honest about what they're offering - and how much it costs.

What if my company offers solar energy?

If your company offers solar energy, remember that claims must not only be truthful, but also comply with established consumer protection laws, including the FTC Act and the FTC's new Impersonation Rule. Be truthful. Every clean energy company has a responsibility to be honest and upfront with consumers. Be transparent about what you're offering.

How many bogus energy rebates are there in 2022?

Data from Action Fraud, the national fraud database, showed there had been 450 reports in 2022 related to bogus energy rebates, or where fraudsters had referred to solar panels, heat pumps, and other forms of renewable energy - up 50pc from the year before.

How do I know if a solar contract is a scam?

Pay attention to warranties, cancellation policies, payment schedules, and try to spot any hidden fees. Honest businesses will give you time to go over the terms of the contract, understand the agreement, and let you sign it in writing. To learn more, visit ftc.gov/solar. And if you spot a scam, tell the FTC.

Is solar energy a good idea?

Solar energy and other high efficiency home improvements can help reduce energy consumption and lower utility costs for homeowners. As going solar or using clean or renewable energy gets more popular, bad actors have joined the movement, too.
