Like a household solar array, the PV panels - which are often separate (sometimes folding) add-ons connected to the generator unit - absorb sunlight and convert it into electricity to be used instantly or stored in the generator's batteries. From there, you can connect various devices, from lights to appliances, directly to the generator.

Now you can just read the solar panel daily kWh production off this chart. Here are some examples of individual solar panels: A 300-watt solar panel will produce anywhere from 0.90 to 1.35 kWh per day (at 4-6 peak sun hours locations).; A 400-watt solar panel will produce anywhere from 1.20 to 1.80 kWh per day (at 4-6 peak sun hours locations).; The biggest 700 ...
