

Where is China Three Gorges University located?

China Three Gorges University (CTGU; ) is a provincial public university in Yichang, Hubei, China. It is affiliated with the Province of Hubei and sponsored by the provincial government. The university was established in 2000 by the merger of Wuhan Hydraulic and Electric Power University Yichang ( ) and Hubei Sanxia College ( ).

How much energy is produced at Three Gorges Dam?

Power generation at Three Gorges is managed by the China Three Gorges Corporation as well as their subsidiary, China Yangtze Power. The expected annual energy output is expected to be about 84.7 TWh, which makes the Three Gorges Dam one of the biggest energy stations in the world.

Why is education important in the Three Gorges Reservoir area?

This research provides technical support for the prevention and control of erosion on soil bank slopes in the Three Gorges Reservoir area. Education is the cornerstone of national development and is also an important tool for the country.

Does ecological security improve in the Three Gorges Reservoir area (TGRA)?

Wei (2010) has employed the PSR model to evaluate ecological security in the Three Gorges Reservoir Area (TGRA) since it became a direct-controlled municipality and found that ecological security in the TGRA showed signs of improvement from 1997 to 2007, but it is still at an insecure state.

How efficient are Three Gorges turbines?

Efficiency of the turbines averages over 94%. Three Gorges was projected to produce 11% of China's electricity. However, with huge electricity demand, Three Gorges could end up contributing much less. Fig. 3: Birds-Eye View of the Reservoir.

Who funded geography and territorial research?

Geography and Territorial Research, 18 (1), 67-71. This research was funded by the Natural Science Foundation of Chongqing (Grant No. cstc2019jcyj-msxmX0290), the Fundamental Research Funds for the Central University (Grant No. SWU021003) and the National Social Science Fund of China (Grant No. 19XGL027).
