What is a battery storage enclosure?

Custom metal enclosures designed to optimise your battery storage. Our battery storage enclosures will keep your battery energy storage system (BESS) protected from the elements. We custom-make bespoke enclosures in a range of sizes, with enormous battery storage possibilities.

What is an energy storage enclosure?

Our energy storage enclosures are designed to maintain the optimum ambient temperature for your batteries. Whether you need a liquid-cooled or air-cooled system, we'll design the best solution with you. Lifting an unbalanced enclosure is a health and safety hazard, especially when full of heavy batteries.

Why do we need a battery enclosure?

The environment is always doing its best to destroy batteries, and portable batteries are often required in the most demanding locations - on flooded sites, out in all weather conditions, day and night. Our enclosures are designed to optimise battery performance, so controlling humidity is critical.
