Could solar panels increase energy bills this winter?

If energy bills rise as predicted this winter, then the value of electricity generated through solar panels could almost double, says Kevin Holland, managing director of The Solar Shed, a Norfolk-based renewable energy business. He says a typical solar panel system could generate £1,200 worth of electricity in a year at current prices.

Are more solar panels being put on British roofs?

One provider said this month it had seen enquiries about solar panels rise tenfold. "More solar panels are being put on British roofs than ever before," said Chris Hewett, chief executive of Solar Energy UK. The fact that renewable energy helps protect the planet has always made it an attractive option.

How many solar panels are being installed a week?

The energy bills crisis has prompted a big rise in demand for solar panels. Just over 3,000 solar installations are being carried out every week, according to trade association Solar Energy UK, up from 1,000 a week in July 2020. One provider said this month it had seen enquiries about solar panels rise tenfold.

What is the outlook for residential solar energy in the UK?

For much of the past decade, the outlook for residential solar energy in the UK seemed dim. Britain once handsomely subsidised households supplying electricity to the grid, giving the nascent sector a head start.

Who is the Big Solar Co-op?

The Big Solar Co-op is a Co-operative Society registered with the Financial Conduct Authority no. 4877. We are incubated by Sharenergy Co-operative Ltd and supported through startup grants from:

How much electricity do solar panels generate?

The amount of electricity solar panels generate depends on the type and size of system and home. A report for Solar Energy UK suggests that a typical home could cut electricity bills by more than £300 a year.

UK supermarket chain Tesco has unveiled plans to fit 100 of its large stores across the UK with solar panels over the next three years. The project, which could generate ...
