

# Can solar panels be covered

Are solar panels covered by home insurance?

Whenever you're making significant changes to your home, it's always a good idea to contact your home insurance provider to let them know. If you've added solar panels, or are thinking of doing so, give your provider a call. The good news is that a lot of the time they are covered as standard by home insurance policies.

Should I Cover my solar panels when not in use?

Typically, it is not recommended to cover your solar panels when not in use. However, homeowners may want to cover them if their home is going to be vacant for an extended period of time. Of course, it all depends on how long you plan to not use your panels.

Do I need insurance if I install solar panels?

Yes, you should always let your insurance provider know about any significant changes you make to your home - including fitting solar panels - to ensure you're sufficiently covered. As well as improving your home's market value, installing solar panels is likely to increase your home's rebuild value.

What insurance options are available for solar panels?

Specialised insurance options also exist for the installation phase, protecting against financial losses due to accidents or damage during installation. These options include Public Liability Insurance, Personal Accident Insurance, and more. Solar panel insurance comes in various forms, tailored to different needs and installations:

What is solar panel insurance & how does it work?

Solar panel insurance shields homeowners from financial losses due to damage, theft, or other unforeseen events affecting their solar energy systems. Let's dive into solar panel insurance in the UK and see how it can keep your roof (and your bank account) happy. What is not covered by solar panel insurance?

Should you cover solar panels in the winter?

If you do decide to cover your solar panels in the winter, then make sure that you remove the covers when the weather warms up. You don't want to trap heat underneath the covers and damage your solar panels. Should You Cover Your Solar Panels When Transporting Them?

Depending on the type of vent, solar panels could be installed over the vent, the vent could be diverted, or the vent must be avoided. For vents that serve as exhaust for dryers, bathrooms, and attics, solar panels cannot be installed over them. These vents must remain unobstructed by solar panels, which can complicate solar panel installation.

In some cases, way more than you probably need. According to our calculations, the average-sized roof can produce about 21,840 kilowatt-hours (kWh) of solar electricity annually --about double the average U.S.
