But I already stated that my issue isn't necessarily with resource storage. I want to be able to store my gear: weapons, space suits etc without a limit. It makes no sense I have to build a load of storage crates as you can only fit a few space suits in a container before maxing it out but in the lodge I can store as many as I want.

Locker replacements are often required because most intelligent locks are hardwired into lockers, so the old lockers need to be upgraded to support the hardware. Replacing your entire fleet of ...

```
I have built (Using Builder Pattern) an Employee object with three fields Name, Age and Gender.. public class Employee { private String name; private String age; private String gender; // Constructor private Employee(Builder builder) { this.name = builder.name; this.age = builder.age; this.gender = builder.gender; } // Employee Builder public static class Builder { ...
```

With new design, technology and manufacturing processes, there are many reasons why your locker room might need updating. Are they dated, dark, or needing some TLC? Gone are the days when lockers were bland, grey, metallic boxes lined up in the school halls.

This is one of the game's problems that makes me abandon bases. I put down lockers, I later want to expand, but I can't. I find that instead of doing all that micromanaging it's easier to just destroy whatever parts of the base you can and start anew somewhere else, and just use the locker-jammed remains of the old base as a sort of hanger for items.
