Where are Xinjiang Uygur solar panels located?

An employee inspects photovoltaic panels at a solar power plant in Hami prefecture, the Xinjiang Uygur autonomous region, in September. [Photo by Cai Zengle/China News Service] URUMQI - In the vast Gobi Desert in the Xinjiang Uygur autonomous region, over 10,000 pentagonal mirror-like devices form concentric rings resembling a radiating sun.

What is Xinjiang's photothermal power station?

At the very center of the stellar array stands a 220-meter tower. The project is an attempt by the region to capitalize on its abundant solar energy and turn it into heat and electricity. The photothermal power station is the first of its kind in Xinjiang.

How much green energy does Xinjiang have?

According to Wang, the base can generate about 2.1 billion kWh of electricity from green energy annually, nearly 4.5 percent of Shihezi's total electricity output in 2022, saving 650,000 tonnes of standard coal. Xinjiang's installed power capacity from new energy sources has surpassed 62 million kilowatts.

What is Xinjiang's new energy push?

Xinjiang's new energy push is part of the country's accelerating shift from fossil fuels to clean energy. Official data showed that China's installed capacity of renewable energy power generation totaled 930 million kilowatts by the end of 2020, accounting for 42.4 percent of the country's total.

How will China control coal-fired power generation projects in 2021-25?

China has promised to strictly control coal-fired power generation projects and limit increases in coal consumption over the 2021-25 period and phase down coal consumption gradually till 2030.
