

China Southern Power Grid WeChat binds multiple accounts

How much will China Southern power grid invest?

[Photo/Xinhua]China Southern Power Grid,one of the country's two major power grids,vowed to invest 670 billion yuan (\$105 billion)recently in grid network construction during the 14th Five-Year Plan period (2021-25) to ensure power supply stability and boost green power consumption.

Will China's power grid build a digital power grid?

China Southern Power Grid,one of the country's two major power grids,also plans to further step up digital power grid constructionto make sure its percentage of nonfossil energy power generation accounts for 61 percent by 2030.

How many kilowatt-hours does China Southern power grid use?

China Southern Power Grid said the five regions that it covers have consumed 540 billion kilowatt-hoursof clean energy during the first nine months,with the renewable energy generation efficiency reaching 99.81 percent,up 0.22 percent year-on-year. Newly added installation of new energy reached 3.31 million kW.

What is southern power grid's target for Guangdong?

Southern Power Grid has planned to step up the dispatch of surplus electricity - mostly from hydro and renewable sources - to Guangdong from Guizhou and Yunnan. The target is a 40 per cent increase for the 2021-25 period from the preceding five years. In Guangdong, rationing has been tightened to conserve supply.

How much will China's power grid invest in 2021-25?

State Grid Corp of China,the largest power provider in the country,also pledged to invest 2.23 trillion yuan in the power grid,which means the country's total grid network investment will soar to 3 trillion yuanduring the 2021-25 period. Both companies vowed to increase power supplies while implementing power price reforms.

What's behind China's record-breaking electricity consumption?

A heatwave and brisk economic activities have combined to set off record-breaking electricity consumption in southern Chinese provinces, prompting the state-owned power grid operator to ration power to factories and commercial services providers.

China Southern Power Grid Company Limited (CSG; Chinese: 南方电网; pinyin: Zhongguo Nánfang Diàn Lǐn Gōng Sī) is one of the two Chinese state-owned enterprises established in 2002 in a power system reform promulgated by the State Council, the other being the State Grid Corporation of China (SGCC). It is overseen by the State-owned Assets Supervision and Administration Commission of the State Council
