How much power will Guangdong have this summer?

Demand on the Southern Grid, which serves five southern provinces including economic powerhouse Guangdong, is expected to peak at 245 GW this summer, a year-on-year increase of 10%, the grid company added. Electricity demand typically surges in the summer months as higher temperatures push up household use of air conditioning.

Why did China's electricity output hit a new record?

On the same day, Chinese state-owned power generator China Energy reported that its total daily electricity output hit a new record of 4,090 gigawatt hours on Monday as they sought to meet surging loads in the south and east of the country, state media outlet Xinhua said on Tuesday.

The China Southern Power Grid LTD (CSG) is a unique power system, featuring long-distance, large capacity transmission by extra-high-voltage (EHV)/ultra HV (UH V) parallel ac and dc. Half of the load is located in the Pearl River Delta of Guangdong province in the east, while 90% of the primary energy resources are concentrated in Yunnan and Guizhou provinces ...
