

Domestic solar panel prices

How much does a solar panel cost in the UK?

The average cost of a solar panel in the UK based on a 350-watt panel is currently between £500 and £800. However, please bear in mind that this is the price for a single solar panel and does not include the professional installation or any other extras e.g. pigeon proofing. With that said, let's explore some common solar installation scenarios...

How much does it cost to install solar panels?

For the average 3.5kWp solar installation, business costs will come to approximately £2,450. The remaining 10-30% of the cost goes towards labour - the people who will actually fit your panels and the associated kit. This range should cover all domestic installations, including large jobs with more than 20 panels.

How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 - £1,500 whereas polycrystalline solar panels cost about £900 per kW.

How much does it cost to clean solar panels?

However, if you notice your solar panels becoming dirty - for example, bird droppings, or dust building up on them during a dry, hot summer - you should consider getting them cleaned. Solar panel cleaning by a professional will cost around £100, but you can do it yourself with a hose. How much do solar batteries cost?

How much does a 4KW Solar System cost?

The 4kW solar panel system costs between £6,000 and £7,000, requires around 16 panels and covers approximately 29 square metres of your roof. A 3kW system, often used for households of two to three, costs between £3,000 and £5,000, needs around 12 panels and takes up about 22 square metres of roof space.
