Also See: What is Monocrystalline Solar Panel? Double Glass Solar Panels. Double-glass solar modules are made up of two layers of tempered glass that cover both sides of the solar panel. As snow accumulates on a typical solar panel or people stomp on it (during installation), the solar cells bend dramatically, resulting in microcracks on the cells.

Along with a portion of sunlight that is trapped inside the glass that bounces around until it is absorbed by a solar cell. And finally there is a portion of light which passes right through. However this is where bifacial ...

WHITE PAPER BIFACIAL SOLAR PANELS 2019 PAGE 2 OF 5 Unlike photovoltaic (PV) systems that use traditional monofacial modules, bifacial modules allow light to enter from both the front and back sides of a solar panel.
