

# Energy storage box label

Which labels are suitable for PV systems?

Suitable labelling for PV systems as required by MCS guidelines. Labels are printed on self adhesive vinyl and are designed to remain legible and in place throughout the design life of the system. The Wind & Sun label packs are suitable for typical domestic systems or labels are available in sheets of one type.

What are wind & sun label packs?

Labels are printed on self adhesive vinyl and are designed to remain legible and in place throughout the design life of the system. The Wind & Sun label packs are suitable for typical domestic systems or labels are available in sheets of one type. Large quantities are also available on a roll by request.

Do you need a label for a solar PV installation?

Pack containing labels needed for a typical domestic solar PV installation. Dual supply labelling should be provided at the service termination, meter position and all points of isolation between the PV system and supplier terminals to indicate the presence of on-site generation and indicating the position of the main a.c. switch disconnector.

What should a switch enclosure be labelled with?

Switch enclosures should also be labelled with 'Danger - contains live parts during daylight'. The d.c. junction box must be labelled with: 'PV array d.c. junction box, Danger contains live parts during daylight'. This switch shall clearly show the ON and OFF positions and be labelled as 'PV system - main a.c. isolator'.
