The Bulldog CT440 is the strongest additional container lock I have seen on the market. The unit weighs 8.3 kg and as shown in the video above a serious looking container lock that should dissuade the casual thief. The lock secures between the 2 locking bars on the front of the container so even if the padlocks are cut off the doors are still secured together.

They come in various sizes and materials and can be used with locking bars or rods that fit into door handles or holes on the container. ... When it comes to shipping containers, security is of utmost importance. Shipping ...
