(Gen1 batteries).

What type of inverter/charger does the energy storage system use?

The Energy Storage System uses a MultiPlus or Quattro bidirectional inverter/charger as its main component. Note that ESS can only be installed on VE.Bus model Multis and Quattros which feature the 2nd generation microprocessor (26 or 27). All new VE.Bus Inverter/Chargers currently shipping have 2nd generation chips.

How many batteries can be installed in the Eaton xstorage compact?

Battery pack One battery string (1 master battery pack and 4 battery packs) is installed in the Eaton xStorage Compact 20 kW - 40 kW unit. Up to 2 battery strings (1 master battery pack and 4 or 9 battery packs) can be installed in the external battery rack for more energy capacity.

How do I feed-in PV power via an MPPT solar charger?

Feed-in of PV power via an MPPT Solar Charger can be enabled or disabled in the Energy Storage Systems menu on the CCGX. For grid-tie inverters, the only option is to use a Fronius grid-tie inverter and use the Fronius Zero Feed-in function.

How do I prevent a solar charger from feeding energy to the grid?

Policy 4: Prevent feeding energy to the grid: There are two options here; first - use ESS, but do not enable Solar charger excess feed-in and it will always be connected to the grid. Or, use the Virtual Switch with ignore AC-Input. Policy 5: Connected to mains, no feedback: Use ESS, select the "Keep batteries charged" mode.
