The first factor in calculating solar panel output is the power rating. There are mainly 3 different classes of solar panels: Small solar panels: 50W and 100W panels. Standard solar panels: 200W, 250W, 300W, 350W, 500W panels. There are a lot of in-between power ratings like 265W, for example. Big solar panel system: 1kW, 4kW, 5kW, 10kW system ...

If you already have 240V appliances at home or in your RV or boat (e.g. a water heater, cooking range etc.), then it makes sense to get a 240V solar generator to power them. A 240V solar generator is also ideal if you are planning to buy some 240V appliances. You can power these appliances off-grid or keep them running in case of an emergency.

The panels are rated for a minimum of 25 years with minimal power reduction. 100 watt solar panels are an optimal size for mounting with 1 person and easy to ship without damage. Larger 200+ watt solar panels are easily damaged in shipping and are usually too heavy/awkward to lift and install by one person.
