Do photovoltaic systems need maintenance?

The expansion of photovoltaic systems emphasizes the crucial requirement for effective operations and maintenance, drawing insights from advanced maintenance approaches evident in the wind industry. This review systematically explores the existing literature on the management of photovoltaic operation and maintenance.

What is operation & maintenance (O&M) of photovoltaic systems?

1 Introduction This guide considers Operation and Maintenance (O&M) of photovoltaic (PV) systems with the goal of reducing the cost of O&M and increasing its effectiveness. Reported O&M costs vary widely, and a more standardized approach to planning and delivering O&M can make costs more predictable.

Why is maintenance management important for PV power plants?

Therefore, maintenance management is essential for reliable and effective operation of PV power plants, ensuring uninterrupted system operation and minimizing downtime. Compared to well-established technologies such as hydro, thermal, and wind, the O&M processes for PV systems are not yet fully structured in many operating companies.

What is a photovoltaic system review?

This work intends to make a review of the photovoltaic systems, where the design, operation and maintenance are the key points of these systems. Within the design, the critical components of the system and their own design are revised.

What is a PV system to be maintained?

The definition of the PV system to be maintained shall include PV modules, the support structure, disconnects, inverter(s), monitoring equipment, and all other appurtenances to make the PV system complete, grid-connected, and operational. 104

What is FIDIC template adapted for solar PV power plant O&M?

Among the common templates used in the O&M contracting is the one of the International Federation of Consulting Engineers (so called FIDIC template) adapted for solar PV power plant O&M.

This review work presents an overview of the innovations shaping today's photovoltaic (PV) operations and maintenance sector by summarising literature and current research.
