Knowing the engine type of your generator is another essential step in selecting the right oil. Most generator engines require high-quality detergent oil to keep running smoothly and prevent deposit buildup. Engine oils for 4-stroke engines differ from those needed for two-stroke engines, which may require a pre-mixed solution. ...

2. Prevent wrong installation: When maintaining and assembling the fuel supply system, the oil return pipe cannot be installed at the oil inlet end of the fuel injection pump, and the oil return valve cannot be installed with fewer parts or in the wrong position. Nor can the oil return valve be replaced with ordinary oil pipe joint bolts.
