How do I compare solar panel prices & quotes?

Here you can compare solar panel prices and solar panel quotes with ease and find lowest cost panels. Simply type your postcode into the box below and select one or many local and national, trusted solar panel installers and ask them for a quotation.

What should a solar panel quote include?

Most importantly, your solar panel quote will estimate the overall cost of your solar panel system. This will include a breakdown of both material and labour costs, so you have a better idea of where your money is going. When it comes to buying solar panels, most homeowners have one thing at the forefront of their minds: the price.

How do solar panel quotes work?

Solar panel quotes typically include an estimate of how much money you could save on your energy bills. This projection will be based on your annual electricity consumption, so bear in mind that this could change if you start to consume more electricity after the solar panels are installed.

How many quotes should you compare before buying solar panels?

When it comes to buying solar panels, most homeowners have one thing at the forefront of their minds: the price. That's why we recommend comparing at least three quotes before committing to one - that way, you can make sure you're getting the best deal for your home.

How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 - £1,500, whereas polycrystalline solar panels cost about £900 per kW.
