

Installation cost of leasing rooftop photovoltaic panels

How much does a solar panel installation cost?

The average residential solar panel installation consists of either 12 or 16 solar panels. The average cost of a solar panel installation in the UK is between £5000 and £8000. If you have three people or more living in your home, then most professional solar panel installers will recommend you install a 3kWh solar panel system.

Can I lease a roof space for PV panels?

Anyone considering agreeing to a lease of their roof space for fitting PV panels should be aware that most lenders' mortgage conditions will require the lender's consent to be obtained to any lease.

What is a solar panel rent-a-roof scheme?

The Rent-a-Roof scheme lets people who can't otherwise afford solar panels gain access to them, through installers who will setup solar panels on roofs for reduced prices. Installers can then sell any excess electricity generated back to the grid.

How do I finance a solar panel installation?

There are different ways to finance your solar panel installation. Besides solar lease or direct purchase you can also obtain a personal solar loan, consider adding the cost of a PV installation to your mortgage or opt for a solar panel subscription. The latter option is part of our offer.

Do you need a lease for PV panels on a residential property?

This guidance provides information for photovoltaic (PV) panel providers and the public about lenders' minimum requirements with respect to consenting to a lease of roof space for the installation of PV panels ('the panels') on the roof of a residential property.

Can you get free solar panels on your roof?

Thanks to rising energy prices, more and more people are looking to invest in solar energy as a way of saving money and reducing their energy bills, making the prospect of free solar all the more tempting. Known as the "rent-a-roof" scheme, a growing number of companies are offering to fit and maintain solar panels on your roof for free.

PV systems are currently in high demand - they convert solar energy into electricity. Per kilowatt (kW) of installed capacity, a system costs about CHF 2,700. For a private residential building or single-family home, experts today recommend a system of around 50 m² (= 10 kW output).

The best way to understand and compare estimates between different installers is to determine how much your solar panel system will cost per watt (\$/W). You can do this by taking the total dollar cost of your solar panel

Installation cost of leasing rooftop photovoltaic panels

system, subtracting out any included battery costs, and dividing it by the number of watts (kW x 1000).

Solar panel installation costs a national average of \$16,500 for a 6kW solar panel system for a 1,500 square ft. home. The price per watt for solar panels can range from \$2.50 to \$3.50, and largely depends on the home's geographical area. Residential solar panels are usually sized at 3kW to 8kW and can cost anywhere from \$9,255 and \$28,000 in total installation costs.
