In the U.S., residential solar installations have been continuously increasing during the last few years, reaching 1GW DC in the Q4 of 2021. This solar energy adoption is driven by many factors, such as the cutting-edge technologies that are being developed, like instance solar shingles.

Solar Panel roof tiles. Solar panel technology has come such a long way that we now have solar tiles instead of just panels. So, if you're going to replace your entire roof anyway, consider installing solar roof tiles instead of the usual tiles. This route might save you more money while making your entire home less dependent on the grid.
