

# Is it good to install solar power in shops

Why should you install solar panels on a shopping mall?

Electricity can be stored in batteries until it is needed during an emergency or when the sun goes down. Solar power provides an efficient source of power. Renewable energy produces zero pollution. Installing solar panels on shopping mall rooftops provides great publicity for reducing pollution.

Is it worth buying a solar energy system?

Buying a solar energy system can save you time and potentially money. When considering a solar energy system, sometimes the best option is to buy a full solar kit, which includes all necessary components as a single packaged deal.

Should your business install solar?

If your primary reason for installing solar is to meet a significant proportion of your business's electricity demand, make sure you have past consumption data to refer to. This should go back at least a few years - and make sure you take into account any meaningful changes due to outside factors.

Should your business use solar energy?

If your business is power-sensitive and relies on a perpetual supply of power, you should consider using solar energy. The grid isn't always reliable, as it can go off without notice.

Can solar power power a shopping mall?

Using solar power to power a shopping mall is a great idea. Malls, with their large expanses of flat roof space, are a logical place to install solar panels. Any business related to trade, in one way or another, consumes electrical energy. Accordingly, the use of solar power plants is economically justified and expedient.

How much does it cost to install solar?

The estimated cost of installing solar is around £1,000 per kW of installed capacity. Solar Energy UK reports that the payback time on a commercial solar array can be less than five years. After that, they'll produce free electricity for another 25 years or more.
