

Is the after-sales service of photovoltaic panel companies easy

What is a photovoltaic solar panel?

Combines photovoltaic cells with solar thermal panels, so that the same panel can generate heat and electricity. The technology is still very new, so needs specialist installation with higher costs.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

What's the customer feedback like for a solar installation service?

Customer feedback is very good, with a 4.5 Trustpilot average and more than 1,400 mostly positive reviews for a range of installation services including heat pumps, electric heating and solar PV systems. "They did an excellent job and ensured that I was set to go!"

How do I know if a solar PV company is a good company?

Check that the solar PV company is MCS certified. This is often required for government support schemes or to get Smart Export Guarantee (SEG) payments. Check if your installer is a member of RECC. Members agree to uphold high standards of consumer protection. RECC runs dispute resolution if you need it.

What should I consider before choosing a solar panel company?

Before you invite any solar panel firms to give you a quote, consider what type of solar PV you want. The most popular, most efficient and most expensive option. Very space efficient, so they need the smallest amount of roof space. Made from a very pure form of silicon. High power output.

How many solar panel installers are there in the UK?

There are over 4,000 registered solar panel installers in the UK - credit Solar Fast With over 4,000 registered installers in the UK in 2024, finding the right installer for your project can be hard work, especially on top of the cost of solar panels in the UK in 2024. So we're here to help.

Is the after-sales service of photovoltaic panel companies easy

Overview. With after sales service, customer relationships do not end with the conclusion of a transaction, but are maintained for a product's entire duration of use. Unfortunately, solar companies, especially in developing countries, grant after sales service much too little importance. This is fatal, as substantial deficits in after sales service are currently one of the reasons for ...

After-sales service: Quality suppliers will provide good after-sales service, such as multi-year warranty, thus ensuring that customers are still fully protected after purchase. Response speed: The response speed and problem solving ability of the supplier is also an important factor to consider. Timely and effective communication helps to solve problems quickly and reduce ...
