Jiangyin Haihong New Energy Technology Co., Ltd. (abbreviation to Haihong) was founded in 2011. It is a modernized management enterprise focusing on the overall solutions research and development of solar mounting systems and other photovoltaic modules. The main business is the design and development, production and sales of solar mounting system, The business scope ...

The company is a high-tech photovoltaic enterprise integrating R&D, production and sales. The company has a group of high-quality technical developers and professional management personnel, adhering to the concept of "powered by science and technology, survival by quality", combining international advanced design ideas, perfect management system, superb ...

1. Introduction 1.1. Background. With the intensification of energy shortage and environmental pollution, renewable energy has attracted worldwide attention [1 - 4]. The solar photovoltaic (PV) power is abundant, clean, and convenient and also has been considered as one of the most promising renewable energies [5,

Jiangyin Haihong New Energy Technology Co., Ltd. is a manufacturer specializing in the design and production of solar mounting system. Established in 2011, the company is located in Jiangyin City, Jiangsu Province with nearly 500 employees.

Photovoltaic (PV) generation systems have been shown to have a promising role for use in high electric-load buildings, such as the closed plant factory which is dependent upon artificial lighting.

to the particularity of the PV support structure, the impact of different factors on the PV support's wind load

should be comprehensively considered, and a more accurate method should be adopted

2. Photovoltaic material or absorbing layer The photovoltaic material is the heart of the CIGS solar cell. This is a p-n heterojunction manufactured by placing a p-type layer made from copper indium gallium selenide (CIGS) through co-evaporation and a p-type layer of Cadmium sulfide (CdS) deposited by CBD on top of the CIGS. 3.
