

Jingdong IKEA photovoltaic panels

Does IKEA sell solar panels in UK stores?

IKEA, the Swedish furniture giant, made headlines when it began selling solar panels and solar batteries in UK stores in 2017. The move aimed to encourage homeowners to switch to renewable energy sources and reduce their carbon footprint.

How much do IKEA solar panels cost?

If you wanted a set of 10 polycrystalline solar panels from IKEA with 2.6kWp (kilowatt 'peak' power output) in 2019, prices started at £5,230. While 10 black monocrystalline panels with a peak power of 2.8kWp started at £5,578. For additional costs, you could also have an IKEA solar battery installed alongside your solar system.

Is IKEA accelerating its transition to 100 percent renewable electricity?

[Photo provided to China Daily] IKEA has recently launched a new program to accelerate its suppliers' transition to 100 percent renewable electricity globally, including its direct suppliers in China. Almost two-thirds of the IKEA climate footprint is directly connected to the supply chain, including production at suppliers.

How does IKEA's 100 percent renewable electricity program work?

The program enables nearly 1,600 direct suppliers to purchase 100 percent renewable electricity. IKEA will provide for local solutions, such as bundled framework agreements and Power Purchase Agreements, to purchase renewable electricity from the grid, thus enabling direct suppliers to consume 100 percent renewable electricity in their production.

Our experts have researched a broad range of solar panels on the market to help you decide which option best suits your needs. While looking at different providers, we examined the cost of solar panels, as well as their efficiency, reliability and low-light performance. We also surveyed over 2,000 UK-based solar panel owners to find out how they ...
