Should guidance on solar PV be included in the National Policy Statement?

The solar industry very much welcomes the addition of guidance on solar PV to the National Policy Statement for renewable energy infrastructure. However, there are several provisions which could be strengthened, which we have outlined below.

What are energy national policy statements?

Energy National Policy Statements provide planning guidance for developers of nationally significant energy infrastructure projects. The energy National Policy Statements cover: The guidance makes it easier for decision makers, applicants and the wider public to understand: The 2023 revised NPSs (EN-1 to EN-5) came into force on 17 January 2024.

Should a target for solar generation be included in the NPS?

This equates to roughly 40GW of solar by 2030, and the solar industry body, Solar Energy UK, has demonstrated in its 2021 report "Lighting the Way" that this target is possible. We recommend that a target for solar generation should be included in the NPS.

Does the NPS EN-3 include solar farms?

In National Policy Statements (NPSs). The NPS EN-3 for renewable energy infrastructure (PDF) currently in force does not include policies for solar farms. The government consulted on its proposed updates to the energy NPSs in 2

What is the National Policy Statement (NPS)?

1.1.5 This National Policy Statement (NPS), taken together with the Overarching National Policy Statement for Energy (EN-1), provides the primary policy for decisions by the Secretary of State on applications they receive for nationally significant renewable energy infrastructure defined at Section 1.6 of this NPS.

Does government support solar?

It sets out that government is supportive of solar that is "co-located [footnote 80] with other functions (for example, agriculture, onshore wind generation, or storage) to maximise the efficiency of land use".

The designation of the new NPS will help to solve this policy conflict a degree because it is the latest national planning policy position and does not contain the onerous test of the WMS. Indeed, the new test about land quality not being the predominating factor, counters the compelling evidence requirement.

Power Policy & Regulation. All Projects; Renewables and Energy Efficiency. ... the Union Minister for New & Renewable Energy and Power disclosed a remarkable surge in India's solar power capacity. According to the latest figures, the country's installed solar power capacity has soared from 2.82 GW as of March 31, 2014, to an impressive 73. ...

The Energy White Paper 2020, the British Energy Security Strategy 2022, Powering up Britain 2023, the emerging revised draft NPS in 2021 and 2023, and variations to ...

Removing the 1MW restriction for industrial rooftop solar will help us meet our target of 70GW of solar power by 2035 while supporting hundreds of long-term skilled British jobs, bolstering our ...

In Union Budget 2023-24, INR 7,327 Cr was allocated for the solar power sector, including grid, off-grid and PM-KUSUM projects, a 48% increase over the previous year. India's solar power sector is a sunshine opportunity waiting ...

The Labour Party will create Great British Energy, a new, publicly-owned clean energy company. We will harness Britain's sun, wind and wave energy to: Save £93 billion for UK households. Deliver one hundred percent clean power by 2030. Cut energy bills for good. Create thousands of good local jobs. Deliver energy security.

This position was reinforced in the new National Policy Statement (EN-3), published in January this year, which stated that "Solar also has an important role in delivering ...

They introduced a new solar power policy in 2018. This policy aims to boost solar projects by offering many benefits. ... In Andhra Pradesh, India, the state and national governments are backing solar power projects. They're giving out various financial incentives. These are aimed at making solar projects more appealing for development.

India has achieved 5th rank in the world in solar power deployment. As on 30-06-2023, solar projects of capacity of 70.10 GW have been commissioned in the country. The capacity of 70.10 GW includes 57.22 GW from ground-mounted solar projects, 10.37 GW from rooftop solar projects, and 2.51 GW from off-grid solar projects.

# Latest national solar power policy

The Union Minister for New & Renewable Energy and Power has informed that the targets set under the National Solar Mission were: To create an enabling policy framework for the deployment of 20,000 MW of solar power by 2022. This target was enhanced in 2015, from 20,000 MW to 1,00,000 MW of grid-connected solar power projects by 2022.

The government has already signed off on more than 1 GW of new solar capacity. ... Updated versions of the national policy statements came into force in January 2024, after Sunnica was assessed. ...

India aims to hit 100 GW of solar power by 2022 as part of the Jawaharlal Nehru National Solar Mission (JNNSM). To meet these goals, ongoing progress and supportive policies at the state level are critical.

EN-1 states that "a secure, reliable, affordable, net zero consistent system in 2050 is likely to be composed predominantly of wind and solar" and EN-3 confirms that "solar is a key part of the ...

grid stability . It is proposed to promote Wind- Solar Power projects, inline with National Wind Solar Hybrid Power Policy notified by the MNRE, GoI, New Delhi, to enable better utilization of common infrastructure and related facilities. 3. Government, after detailed discussions on the proposal received in reference 2nd read above,

The Ministry of New and Renewable Energy (MNRE), Government of India has notified the National Bioenergy Programme on November 2, 2022. MNRE has continued the National Bioenergy Programme for the period from FY 2021-22 to 2025-26. (3.2 mb, PDF)View : 6: 30.09.2022: Ministry of New & Renewable Energy Grid Solar Power Division

Overview. Ministry of New and Renewable Energy, Government of India is implementing the Production Linked Incentive (PLI) Scheme for National Programme on High Efficiency Solar PV Modules, for achieving manufacturing capacity of Giga Watt (GW) scale in High Efficiency Solar PV modules with outlay of Rs. 24,000 crore.

Read the Policy document here: Delhi Solar Policy 2023. The Delhi Solar Energy Policy 2023 (hereafter, "the policy") was notified in March 2024 with the goal of increasing installed rooftop solar capacity to 750 MW within the state and accessing utility-scale solar capacity of 3,750 MW from outside the state.

## Latest national solar power policy

deploy 54GW of solar by 2035 to keep on track to deliver net zero by 2050. This equates to roughly 40GW of solar by 2030, and the solar industry body, Solar Energy UK, has demonstrated in its 2021 report "Lighting the Way" that this target is possible. We recommend that a target for solar generation should be included in the NPS.

Get information about the Jawaharlal Nehru National Solar Mission Scheme by the Ministry of New and Renewable Energy (MNRE). User can access mission document, guidelines and office memorandums related to grid connected, off grid and de-centralized solar power, etc. Downloadable application forms are also available.

Page 3 of 15 The Mission will adopt a 3-phase approach, spanning the remaining period of the 11th Plan and first year of the 12th Plan (up to 2012-13) as Phase 1, the remaining 4 years of the 12th Plan (2013-17) as Phase 2 and the 13th Plan (2017-22) as Phase 3. At the end of each plan, and mid-term during the 12th and 13th Plans, there will be an ...
