Make a difference with waterlogic Waterlogic contribute to the reduction of 25.2 billion single use plastic bottles a year. Rent or buy a new water dispenser with touchless foot-operated pedals to provide unrivalled water purity and hygiene for your office when you need it most.

Why should you install an under sink water dispenser?

Even your customers will thank you for providing quality water, refreshing and rejuvenating them with every sip. Irrespective of where you want to have your under sink water dispensers installed, your entire facility will enjoy a constant supply of cool, chilled and sparkling water.

What is a mains-fed dispenser?

Mains-fed dispensers provide a sustainable way of providing your home, office, or workplace with fresh drinking water, eliminating the need for single-use plastic. We have a wide range of coolers to suit your budget. If you have any questions about any of our machines, get in touch with our experts who are always ready to help.

How does a mains-fed water dispenser work?

Water is drawn from the mains water line into the machine, filtered and chilled before dispensing, providing a constant supply of refreshing water. Mains-fed dispensers provide a sustainable way of providing your home, office, or workplace with fresh drinking water, eliminating the need for single-use plastic.

If you're looking after the water dispenser, you'll need to regularly buy and replace the water bottles which is inconvenient and can be costly. Freestanding water dispensers Similar to your countertop dispenser, these are just larger units that sit on the floor and are designed to accommodate high-volume water bottles.

**Problem:** Water is leaking from the dispenser, causing a mess on the floor. **Solution:** Inspect the water bottle for damage or cracks, and replace it if necessary. Ensure the bottle is seated correctly on the dispenser. If the leak is coming from the dispenser itself, check the internal components, such as the valve, tubing, or seals, for
