Our logo maker is easy to use, allowing you to create a custom solar panel logo in just a few clicks. Simply choose your favorite design, customize it to your liking, and download your high ...

What are hybrid solar panels? A hybrid solar panel is a combination panel that can produce electricity and heat at the same time. They're also known as solar PV-T, or solar photovoltaic-thermal panels, meaning they take both energy and heat from the sun.. What that means for us, is that we can use one panel to generate electricity as well as heat and hot water.

RECC members work with a range of renewable technologies from solar photovoltaic (PV) systems, solar water heating systems, ground and air source heat pumps and boilers fuelled by wood chips or pellets. They also work with common "add-ons" such as battery storage systems, voltage optimisers and i-boost systems.
