What voltage does a low voltage grid supply operate at?

The low voltage grid supply in the UK operates at voltages and frequencies harmonized by BS EN 50160, i.e. at 230/400 V 50 Hz a.c. (or 230 V 50 Hz a.c. for three-wire three phase systems earthed at one of the phases).

What are electrical energy storage systems (EESS)?

Electrical energy storage systems (EESS) for electrical installations are becoming more prevalent. EESS provide storage of electrical energy so that it can be used later. The approach is not new: EESS in the form of battery-backed uninterruptible power supplies (UPS) have been used for many years. EESS are starting to be used for other purposes.
