

Mountain Mule Camel Photovoltaic Panel

Does the CamelBak MULE PRO 14 have a reservoir?

The back panel is most excellently called 'Air Support' and really does help reduce sweaty back syndrome. It wouldn't be a CamelBak without a reservoir and the CamelBak M.U.L.E. Pro 14 features the excellent Crux Reservoir which holds three litres.

How does camel solar work?

To maximize heat collection and minimize heat loss, Camel Solar's innovative design includes seamless absorbers. Rather than lasering, or ultrasonically welding the absorbers together, the absorbers are fused using a unique design which maximizes efficiency, as well as improving the overall look of the panels.

Why should you choose camel solar?

Camel Solar's innovative technologies have increased the efficiency of solar panels considerably and for that reason Camel Solar are considered leaders in today's solar thermal collector marketplace. Camel Solar's new absorbers do not show welding lines, waves or deformation making them more efficient and aesthetically pleasing.

Does a CamelBak have a reservoir?

It wouldn't be a CamelBak without a reservoir and the CamelBak M.U.L.E. Pro 14 features the excellent Crux Reservoir which holds three litres. As well as a compartmentalised main storage chamber, the M.U.L.E. Pro 14 has a hip belt with cargo carrying capability (which is a must) and a removable bike tool organiser wrap thingy.

I recently bought a CamelBak MULE to use as a larger hydration pack than my more racier HydraPak AirScoop. I had an older MULE from 5-6 yrs ago and was pretty pleased with it, so I went with another one. ... the molded eva back panel is not like the AirScoop, i have one of those too.. doesn't sit so high off the back.. all in all, a great ...

The back panel is CamelBak's Air Direct construction which incorporates a mesh panel stretched over raised, ridged foam sections. One portion sits at the lower back while the other two sit under the shoulder blades. After riding on a couple of warmer days, we noticed the backs of our shirts were nearly as saturated as with older packs.

New findings from the WSL Institute for Snow and Avalanche Research (SLF) and Lausanne's Federal Institute of Technology (EPFL) suggest that alpine photovoltaic (PV) ...
