

North China Electric Power University

Solar Power Generation

What is North China electric power University?

North China Electric Power University is the cradle for senior talents engaged in electric power in China.

Who owns ncepu University?

At present,NCEPU is a key university jointly constructed by the Ministry of Education and the University Council,which is composed of State Grid Corporation of China,China Southern Power Grid Co.,Ltd.,China Huaneng Group,China Datang Corporation,China Huadian Corporation,China Guodian Corporation and China Power Investment Corporation.

When was North China Institute of electric power renamed?

It was later renamed the North China Institute of Electric Power when its location was moved to Baoding,Hebei province in 1970. When the school merged with the Beijing Power Engineering and Electronics Institute in 1995,it was given its present name. In 2006,the university relocated its main campus back to Beijing.

When did Beijing Institute of electric power become a university?

The university was established as the Beijing Institute of Electric Power in 1958. It was later renamed the North China Institute of Electric Power when its location was moved to Baoding,Hebei province in 1970. When the school merged with the Beijing Power Engineering and Electronics Institute in 1995,it was given its present name.

What does ncepu stand for?

Publishing time:2016-12-23 Viewer: North China Electric Power University(NCEPU) is a state key university directly affiliated with the Ministry of Education of China. It has been officially listed in the national "211 Project".

Is ncepu a 211 Project?

It has been officially listed in the national "211 Project". As a major public university,NCEPU is characterized for its predominant disciplines of "Energy Resources &Electric power",and committed to providing talents and technologies for the development of the Chinese electric power industry.

breakthrough of the common laws, phenomena and applications in the power generation process of renewable and clean energies, carries out research on storage technology of renewable ...

Solar aided power generation technology has been proved to be one of the most efficient ways to integrate solar energy into a coal-fired power plant. ... North China Electric Power University ...

North China Electric Power University

Solar Power Generation

Xiangjie Liu's research while affiliated with North China Electric Power University and ... In a high solar-power-penetration power grid, photovoltaic (PV) power generation requires to run in a ...

Gui LU, Professor (Associate) | Cited by 1,620 | of North China Electric Power University, Beijing (NCEPU) | Read 69 publications | Contact Gui LU

Li G (2012) Research on modeling and control strategy of 1 MW Tower Solar Power Generation System. North China Electric Power University, Dissertation (in Chinese) Google Scholar Li X, Zhao XH, Li JY, Li W, Xu N et al (2015) Life cycle cost electricity price analysis of tower solar thermal power generation.

Solar-powered multi-generation systems contribute to efficiently reducing the consumption of fossil fuels and lowering greenhouse gas emissions. ... North China Electric Power University; All co ...

Find 3463 researchers working at North China Electric Power University | Beijing, China | NCEPU. ... Solar; Power Generation; Power Systems Analysis; Zhirong Liao. Disciplines.

Cheng Wang received the B.Sc. and Ph. D. degree in 2012 and 2017 from Tsinghua University, Beijing, China, both in electrical engineering. He was a Visiting Ph.D. student at Argonne National ...

North China Electric Power University ... Expanded wind and solar power development in China requires a deeper understanding of their differences in variability and intermittency, both spatially ...

Chao XU, Professor (Full) | Cited by 6,512 | of North China Electric Power University, Beijing (NCEPU) | Read 158 publications | Contact Chao XU

The hybrid system utilizing the 1J GaAs with the base configuration of solar multiple (SM) of 1.26 and TES capacity of 5 h improved the annual power production and renewable penetration (RP) by 20 ...

North China Electric Power University | NCEPU ... Solar-aided coal-fired power generation (SACPG) technology is an effective method of solar energy utilization. It could balance the demand of ...

North China Electric Power University | NCEPU ... Solar steam generation is an efficient way to address global freshwater shortages. However, water evaporation suffers from either inefficient heat ...

North China Electric Power University (NCEPU;) is a public university in Beijing, China. It is affiliated with the Ministry of Education, and co-sponsored by the Ministry of ...

North China Electric Power University ... Dynamic response characteristics and economic analyses of two solar-assisted multi-generation systems. Article. Mar 2024; Xingqi Ding; Libo Yang;

North China Electric Power University (NCEPU) Presentation Topics (June 12): Power forecasting technology of large-scale grid-connected solar & wind generation clusters under diverse and ...

Xiaoze Du's 56 research works with 464 citations and 2,601 reads, including: Study on performance optimization of proton exchange membrane fuel cell with porous ridge flow channel

Zhang HENG | Cited by 1,057 | of North China Electric Power University, Beijing (NCEPU) | Read 94 publications | Contact Zhang HENG. ... A solar-aided power generation (SAPG) system effectively ...

North China Electric Power University ... The emerging solar vapor generation technology is becoming one of the most promising solar photothermal conversion technologies, which could relieve the ...

North China Electric Power University ... Coal-fired power generation units using carbon capture and storage (CCS) can reduce CO₂ emissions significantly whereas CCS consumes large amounts of ...

Zhaohao Ding is currently an associate professor in North China Electric Power University. His areas of interest include power system planning and operation, power market and demand side resources.

Shiwei Xia received the Ph.D. degree in power systems from The Hong Kong Polytechnic University, Hung Hom, Hong Kong, in 2014. Then, he worked as a Research Associate and subsequently as a ...

Shuang Han's 5 research works with 373 citations and 801 reads, including: A comprehensive review for wind, solar, and electrical load forecasting methods

The present study proposes a novel multi-generation system with a solar-driven proton exchange membrane electrolysis cell, and a solid-oxide fuel cell coupled with a parabolic trough...

North China Electric Power University ... The engineering design, construction and testing of a 100 kW_e solar-hybrid power generation pilot plant are conducted in this work. In the pilot plant ...
