How much does a solar inverter cost?

However the real heart of the system is the solar inverter, a very clever piece of kit which costs between £500 and £1,200 on a typical small scale /domestic system (depending on size). A typical commercial-scale inverter (20 kW) can range between £1,500 and £4,500. For this sort of money it's worth a read on what you are buying!

Are premium solar inverters worth it?

The inverter optimises the performance of each string using Maximum Power Point Tracking (MPPT). Some products perform better than others, so it's worth considering if premium solar inverters are worthwhile for your project. Micro-inverters are very small solar inverters, designed to fit one per panel, attached behind the panel.
