A photovoltaic inverter, often known as a solar inverter, is an essential component of solar power systems. It converts the direct current (DC) electricity generated by solar panels into alternating current (AC) electricity, which powers the great majority of our household and commercial products.

Solar inverters (also referred to as photovoltaic inverters) are a crucial component in any solar PV system. Whilst solar panels are key in creating direct current (DC) electricity, a solar PV inverter allows this electrical energy to be converted to alternating current (AC).
