But no matter which of our pitched roof mounting systems for installing a PV system on a tiled or plain tile roof you choose: all systems are particularly easy and efficient to install.

Can solar panels be installed on a tiled roof?

Installing solar panels on roofs is a popular choice for several reasons: low chances of shade from nearby objects, ample space that serves no other purpose, and closeness to your home. How are solar panels fixed to a tiled roof? Solar panels are mounted on a system of rails and roof hooks. The rails float above the roof tiles.

Can I install solar panels on a slate roof?

Not all roofs, including tiled roofs, are suitable for solar panel installation. To determine if your slate roof is compatible, several factors must be considered. Firstly, assess its structural integrity as solar panels add weight to the roof. If needed, reinforce or repair any weak areas before proceeding with installation.

How do you install a roof hook?

To achieve this, you must cut a channel for the roof hook to sit in at the bottom of the upper tile. As you can see in the diagram above, the tiles are flush, and the upper tiles are grooved to make room for the roof hook. Grinding a channel for the roof hook on the back of a roof tile. How does the rail connect to the roof tiles and solar panels?

Can a PV system be integrated into a flat roof?

In some cases, PV systems can be integrated directly into flat roofs (Figure 25), although this is not common because the efficiency of PV modules is reduced because the optimum angle relative to the sun is not achieved.

The rails are held to the roof by roof hooks. They are sturdy metal brackets screwed into the joists underneath the tiles and sit between two tiles where rows of tiles overlap. You can see a diagram of a roof hook above. ...
