

What is a solar photovoltaic company?

The company is mainly engaged in solar photovoltaic system. Focusing on solar photovoltaic mounting research and development, design, production, sales, installation and testing and other one-stop services.

How many production bases does solar power company have?

The company operates three major production bases, encompassing nearly 50,000 square meters of production area. Its main business includes various photovoltaic fixed ground mounting structure, distributed mounting structure, tracking photovoltaic mounting structure, building mounting structure, and distributed power station development, etc.

Can versol mount a photovoltaic power station?

Versol's V-Basic mounting system can be applied to photovoltaic power station in different terrain and environment. The product range includes a wide range of models and styles, and is highly adaptable.

Brackets, flat roof brackets, floor all-aluminum brackets, aluminum alloy column brackets and other products. Bracket products cover the fields of civil, commercial and large-scale photovoltaic power plants. In addition, we provide customized product solutions and OEM services to address the special needs of our customers at home and abroad.

Valsa provides a comprehensive range of quality solar energy solutions and products including mounting system solutions, mounting components, solar panels, inverters, Li-ion batteries, AC and DC combiner boxes, cables, housing, power tools and other accessories.

These requirements also do not cover: performance during exposure to fire, structural attachments for the rack mounting system, structural performance of roof attachments for above roof mounting of photovoltaic (PV) modules and panels, and the mechanical and structural requirements of the IBC or IRC.

PV bracket system is typically constructed by a series of tilted, vertical and horizontal conductor branches as shown in Figure 1. During a lightning stroke, the lightning current will inject into ...
