

What are solar PV panel mounting frames?

Solar PV panel mounting frames are structures that provide a simple solution for safe and secure installation of a solar array. They range from a single panel mounted on a post to large ground-mounted multi-kilowatt PV arrays. Custom frameworks are also available. Solar pv panel mounting frames keep the solar panels in place and ensure their optimal functioning.

Why should you choose a solar PV mounting supplier?

As a solar PV mounting supplier, we provide you with high-quality solar panel ground mounting systems, including solid brackets and support structures so that you can install solar panels on the ground for reliable solar power generation.

What is a solar aluminum frame?

It provided customized frames for over 12GW module manufacturers, accounting for nearly 10% of global market share. Solar aluminum frame is used to secure and seal solar modules, enhance the strength of the module, extend the service life and facilitate transportation and installation.

Why should you choose akcome Solar frame company?

After 15 years of innovation and development, AKCOME solar frame business has won unanimous recognition from customers by virtue of its high-quality products, customized services, and strong R&D strength. The company maintains long-term and stable strategic cooperation with global high-quality photovoltaic module manufacturers.

How to choose a PV mounting system?

The main considerations are day long access to unobstructed sunlight and wire lengths to batteries. Appearance and ease of access for any cleaning etc. should also be considered. PV mounting systems should not adversely affect the weather tightness of the structure to which they are fitted.
