

Photovoltaic panel column bracket installation tutorial

Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel, PVMars will definitely recommend it to you, and effective solutions are based on solar panels' characteristics and your on-site installation environment.

How do I install a fixing bracket on a solar panel?

Attach the Fixing Bracket to the Solar Panel 3. Attach the Fixing Bracket to the Solar Panel's Mounting Hole 4. Attach the Other Leg of the Fixing Bracket 5. Attach the Adjustable Bracket to the Fixing Bracket 6. Connect Multiple Panels (Optional) If you've decided to reduce your reliance on the grid and switch to solar, congratulations!

How to install rigid solar panels on a roof?

EcoFlow's rigid solar panels come with a Tilt Mount Bracket for easy rooftop installation. The components include four fixing brackets, two adjustable brackets, and screws. This should be all you need to mount rigid solar panels on the roof or any other flat surface on your home that receives direct sunlight.

How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.

How do I Mount my solar panels?

There are multiple options for mounting your solar panels. The best option for you is most likely the flat surface on your home that receives the maximum exposure to sunlight. For irregular surfaces, you can augment your rigid solar panel array with flexible solar panels.
