

Photovoltaic panel installation and sales information

Are solar PV panels a good investment?

With a need for UK households to shift to greener more energy efficient systems, alternatives such as solar PV panels are becoming commonplace. Installing a solar PV system is a great investment for those whose property is suitable for this kind of set up.

How much does a solar panel system cost?

Solar electricity is low carbon, renewable energy. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK. That's the equivalent of driving 3,600 miles, or from London to Bristol 30 times. The average domestic solar panel system is 3.5kWp and costs around £7,000.

How are solar panels installed?

We use a safe and strong installation method that uses friction to hold the rail and the edge of the solar panel securely in place. This system has been tested for heavy rain, hail and even hurricanes, so you know it's reliable. The panels are then laid on top of the rails, ready to be connected.

When did solar panels first come out?

Forty-eight years later, the first silicon solar cell was released, quickly followed by the first silicon solar panel in 1954. The rest is history: solar panels allow us to power homes and commercial buildings and grow food and crops.

How much do 4KW solar panels cost in the UK?

GreenMatch's research has found the average prices of domestic 4kW solar panel systems in the UK range between £5,000 - £6,000 (including installation costs), depending on the type of panels you install, their wattage and the manufacturer. Additionally, you can consider solar battery storage.

What pre-install assessments relate to solar PV?

There are a few pre-install assessments that relate to solar PV: Site survey- one of our advisors comes to site, takes measurements, answers questions, and firms up the quote.

The typical lifespan for a solar panel installation is 25 to 30 years. As part of our standard installation package, you'll get a 24 month installer warranty, 15 year manufacturer warranty on solar panels, a 10 year inverter warranty (the inverter converts the electricity you generate into electricity you can use), and a 30 year performance warranty too, which guarantees a minimum ...
