Under the directive, all producers or importers of solar PV materials, including solar panels, have to register under a product consent scheme in which all data about the panels must be provided by the manufacturers [63, 65]. In addition, the producers and importers have to accept responsibility for the EOL treatment of their products or they are subjected to large fines.

Components of solar panel system: solar panels, inverter, AC breaker panel, and net meter. Solar panels are a fundamental part of the system. They have the ability to absorb light and transform it into electricity. When solar energy, or sunlight, falls on panels, the material of solar panels absorbs it and produces direct current (DC).
