

How to unpack PV modules?

Unpacking of PV modules should always be done in the vertical manner by two persons as shown in the diagram. Also care should be taken for falling over one module to the other inside the packing box. Modules should be stored in a dry and ventilated environment to avoid direct sunlight and moisture.

How to pack solar PV modules?

Inside the box each module is placed in vertically. Put the module into the carton from one side with protector on four corners. Citizen Solar recommends that two people should load into and remove the modules from the pack carton for solar PV modules.

What should you not do with a solar module?

Do not disassemble, modify or adapt the module or remove any part or labelling installed by the manufacturer. Do not drill holes in the frame or glass of the module. Do not treat back sheet and front surface of the module with paint and adhesives. Do not artificially concentrate light on the module.

Can you walk on a LONGi Solar PV module?

DO NOT stand or walk on PV modules. Prior to beginning installation, review the Installation Manual for LONGi Solar PV Modules. Do not carry a module alone; always use two people to lift and carry. Do not drill holes in the frame of the module. In addition to invalidating the product warranty, this will also reduce

How to unload & store PV modules?

UNLOADING, UNPACKING & STORAGE At receipt of PV modules, verify the product details as it had been ordered. Packing list pasted outside the box contains all details including the serial no of modules. It is recommended to unload the packing box by using forklift only.

Can solar PV modules be installed in sunlight?

Use of insulated tools and gloves is recommended while working with modules in sunlight. No metallic contacts should be on the human body. The installation of solar PV modules should only be performed by a qualified licensed professional, including, without limitation, licensed contractors and licensed electricians.

The word "module" or "PV module" used in this manual refers to one or more CS-Series Solar Modules. Please retain this manual for future reference. ... 2.0 SAFETY PRECAUTIONS ... 4.0 UNPACKING AND STORAGE Precautions and General Safety ...

IV? Precautions for unpacking ? Do not unpack outdoors under rainy or snowy conditions. ? Do not disassemble or move modules on a windy day. ? Do not move the modules by one ...

Certified installers are trained to handle electrical wiring, assess risks, and apply the best solar panel safety precautions. According to a report by the U.S. Bureau of Labor Statistics, employment of solar photovoltaic installers is ...

8) Do not drop PV modules or allow objects to fall down on the PV modules. 9) Do not touch the terminal box or the ends of the output cables (connectors) with bare hands under sunlight, regardless of whether the PV module is connected to or disconnected from the system. 10) Do not discard the modules at will; special recycling is required. 3.

Solar installations require specific attention to multiple high-hazard conditions. ... All precautions need to be taken to prevent heat and cold illnesses, beginning with training your workforce on the warning signs of each, what to do when a heat or cold illness is suspected, and how to prevent them in the first place. When the conditions ...

o Unpacking of PV modules should always be done in the vertical manner by two persons as shown in the diagram. Also care should be taken for falling over one module to the other inside ...

All PV systems must be earthed as per local regulations, if not otherwise specified it is recommended that requirements of the latest National Electrical Code, ANSI/NFPA 70 (2014- 2017) or other national or international electrical standards be used. o Cover the entire front surface of the PV modules with a dense, opaque material such

Working with solar PV energy systems, which provide several hundred watts of power, will demand that the general photovoltaic safety rules are followed to minimize risk of injury or harm. ... but fixing panels to any roof in the rain can ...

o Before unpacking, installing, wiring, or operating photovoltaic modules - responsible personnel should read and understand all safety precautions. o Module installation should be conducted ...

explanation. The installer should conform to all the safety precautions listed in this guide when installing the module. Local codes should also be followed in such installations. Before installing a solar photovoltaic system, the installer should become familiar with the mechanical and electrical requirement for such a system.

o Potentially lethal DC voltages can be generated whenever PV Modules are exposed to a light source herefore., t ... Canadian Electrical Code Part 1. The System Fire Class Rating of the module or panel in a mounting system in ... UNPACKING AND STORAGE o At time of receipt, verify that the product delivered is in fact the product ordered. ...

5.1 Unpacking and Precautions Solar Panel User Manual and Warranty Card 4. Safety Precautions When light shines on the light-receiving surface of the solar module, the solar module will generate DC electricity with a

voltage of over 24 V. If modules are connected in series, the total voltage is equal to the sum of the voltage

The steps for connecting each solar panel to the microinverter are the same, except for the first and the last microinverters in the solar panel array, which are slightly different. ... Unpacking inspection. After receiving the express, ... Solar panel installation precautions. 1. Generally, instructions are attached when producing photovoltaic ...

or property damage, in connection with handling PV modules, system installation, or compliance or non-compliance with the instructions set forth in this manual. 2 SAFETY PRECAUTIONS WARNING Before attempting to install, wire, operate, PV module connectors pass direct current (DC) when exposed to sunlight or other light sources.

4 UNPACKING INTRODUCTION 4.1 UNPACKING SAFETY For unpacking outdoors, it is prohibited to operate in rainy conditions. Because the carton will become soft and damaged after it gets wet in the rain. The stacked PV modules (hereinafter referred to as "modules") may tip over, which may cause damage or injury to personnel.

UNPACKING INSTRUCTION 3.1 Equipment and Tools: Cutter, Glove, Forklift 3.2 People: No less than two persons 3.3 Unpacking step Packing method A: 1. Cut off straps within the two pallets, and use a forklift to separate the two pallets. 2. Cut off the packing straps of the single pallet, then remove the isolated wood (or plastic wrap) and

? In order to prevent the safety of placing and unpacking modules affected by tilt and uneven ground, please choose flat ground when unloading. ? When unloading on the platform or ground, steel plate pads or tooling shall be used to assist in moving the goods out of the container ...

6 · Unpack the modules as per the recommended unpacking procedures. The whole process of unpacking, transport and storing should be handled with care. (3)Before installation, ...

unpacking. ? Before cutting off the inner packing belt, please take protective measures to prevent the modules

from toppling. Take precautions to avoid scratches on the face or eyes. ? Use scissors or utility knife to cut the packing belt of the outer box. Do not scratch the glass. Check the number of modules in the box after unpacking.

Weather-Related Solar Panel Risks. Solar panels are exposed to all kinds of weather conditions, which may be a risk to use and longevity. Below, we detail the weather-related hazards and the requisite maintenance endeavors to preserve the operational efficacy and integrity of your solar energy harnessing system.

This manual elaborates on installation and safety use information for PV power generating modules (hereinafter referred to as module) of LONGi Green Energy Technology Co., Ltd.(hereinafter referred to as LONGi). Please abide by all safety precautions in this guide and local regulations.

This guide serves as a reference for inspecting, transporting, unpacking, handling and storing LONGi PV solar modules to ensure safe practices for you and the modules. No matter where ...
