Best for small tech: Goal Zero Nomad 20 Solar Panel - \$176.38, Amazon Best for weekend camping: BioLite SolarPanel - \$120, Millets Best for budget buy: Pwxapy Solar Power Bank - \$28.95, Amazon

Solar panel phone chargers work by utilizing small solar panels to harness the power of the sun to charge either your phone's battery directly or a separate battery bank attached to the panel. Most solar chargers can just charge more than just your phone -- anything with a USB connection is usually fair game, although devices like laptops are too power-hungry.

For basic needs, like lights and charging smaller devices, a 50W panel setup can be enough. But if you're going bigger - by running underfloor heating, perhaps - then you're going to want at least three 150W solar panels to do the job. At the higher end are 250W and 320W panels, which you'll typically find in the average home solar panel setup.

Photovoltaic panels as mobile phone holders

o Place the solar panel in a sunny location and adjust it to maximize power. o Ensure the solar panel is perpendicular to sunlight at 45-90 degrees. o Connect it to your device using the included multi-head USB cable. Specification: o Power: 8W o Output Voltage: 6V o Output Current: 1.3A o Material: ABS/PC o IP Rating: IP65
