

Portugal Photovoltaic Energy Storage Exhibition

What is the European photovoltaic solar energy conference & exhibition?

Welcome to the 42nd European Photovoltaic Solar Energy Conference and Exhibition. The innovation platform for the global PV solar sector.

How much solar energy does Portugal produce?

However, despite often reaching over 50% of renewable energy production, only ~6% of that power output comes from solar. Investing in new technologies such as energy storage, floating solar, and green hydrogen, and simplifying the permitting process without sacrificing the environmental needs of Portugal are necessary updates to make.

What is a PV exhibition?

It covers a wide range of PV topics such as device materials, components and systems, wafering, BIPV, agrivoltaics, floating PV and much more! At the same time, it is a state-of-the-art PV Exhibition, where specialized PV Industry presents technologies, innovations and new concepts in the upstream PV sector.

When is the EU PVSEC 2023?

In 2023, the EU PVSEC will be held in the CCL Lisbon Congress Centre, in Lisbon, Portugal from 18 - 22 September 2023, coordinated by the European Commission Joint Research Centre. The EU PVSEC is the world's leading forum for PV Research and Development and the biggest Conference on PV Solar Energy worldwide.

What is the EU PVSEC?

The EU PVSEC is the world's leading forum for PV Research and Development and the biggest Conference on PV Solar Energy worldwide. It covers a wide range of PV topics such as device materials, components and systems, wafering, BIPV, agrivoltaics, floating PV and much more!

How big is Portugal's solar capacity by 2022?

How come Portugal's cumulative solar capacity by the end of 2022 (2.59GW) was smaller than the annual capacity additions that Spain (3.4 GW) and not-that-sunny Netherlands (3 GW) managed to add that year? Boasting the highest solar radiation in Europe, Portugal has huge PV potential.
