

Price of high quality aluminum materials for photovoltaic bracket

Does aluminum alloy need aging heat treatment for solar photovoltaic brackets?

The commonly used aluminum alloy series for solar photovoltaic brackets need to undergo aging heat treatment to achieve the required strength. China Aluminum strictly controls the solution treatment and aging heat treatment process to ensure the required strength of the aluminum alloy brackets.

Is aluminum a good material for solar panels?

With its advantages of light weight, high strength, corrosion resistance and durability, aluminum is widely used in building solar panel frames and photovoltaic supports. Research shows that aluminum is the most widely used material in solar photovoltaic (PV) applications, accounting for more than 85% of most solar PV modules.

What types of solar panels does Chalco stock?

Chalco stock various aluminum extruded solar panel frames and photovoltaic support aluminum alloys, with a variety of finishes to choose from. If the existing products are not suitable for your needs, we can also customize them according to customer requirements.

Which materials are used in solar PV?

Research shows that aluminum is the most widely used material in solar photovoltaic (PV) applications, accounting for more than 85% of most solar PV modules. Products conform to CEE AAMA, GB, BS, EN; CE, DNV, ISO9001 certifications and can provide the TUV and other certifications. Welcome contact

What is the best material for solar panel support?

Aluminum alloy, with its moderate price, strength, processability, corrosion and weather resistance, and recyclability, is an ideal material for solar panel support in solar mounting system, requiring no maintenance over the 25-year operation period. Quick Quote T-profile: capability to offer both support and stability.

Why do solar panels need anodized aluminum profiles?

Because the panel frame is exposed to the natural environment, it has high requirements for corrosion resistance. Chalco provides anodized aluminum profiles to further enhance the corrosion resistance of solar aluminum alloy frames.

International Aluminum has introduced more than 200 sets of professional equipments, all-round realize automatic production, and fully implement the ISO9001 quality management system, ISO14001 environmental management system, OHSAS18001 occupational health and safety management system.
