Are solar panels a waste product?

Due to the WEEE directive, solar panels are considered a specialist waste product which needs disposing of in a specific way; We can take the unwanted panels (our fees are outlined below), cutting costs throughout the process which can ultimately lead to a less expensive project for the consumer. Making PV Solar Panel Production Safer

What are the benefits of recycling solar panels?

Recycling solar panels has a number of environmental benefits. The first is that it creates a useful and sustainable method of disposing of panels that have reached the end of their useful PV lifespan. Recycling solar panels also provides raw materials for repurposing and reprocessing. Cost Savings of Recycling Solar Panels

Solar panels are composed of photovoltaic (PV) cells that convert sunlight to electricity. When these panels enter landfills, valuable resources go to waste. And because solar panels contain toxic materials like lead that can leach out as they break down, landfilling also creates new environmental hazards.

## Price of scrap solar panels
