How do I mount solar on a metal roof?

There are many options when mounting solar on a metal roof, the details of which can impact installation costs and lifetime performance. Metal rooftop mounting consists of two basic parts: the roof mounting hardware and the actual solar panel attachment interface.

Everything you need to buy solar panel mountings, fixings, brackets and rails are available from CEF. Perfect for roof, ground or wall mounted solar panels. We stock wood screws, M10 bolts and flange nuts, multi-rail mountings from big brands such as K2 and more.

A very common mistake is to install the saddle underneath the top hip tile, rather than on top of it. But, if the saddle is installed under the hip tile, driving rain can run down the wall between the saddle and the hip tile.

Saddle board roof solar bracket

The risk is, because the saddle and hip line is sloping, water will run down the saddle into the roof space.

For cars without any rail or pre-installed roof racks, this board roof rack is an excellent choice. The installation can be done quickly without any bars or clips. With this SUP roof rack, you can transport up to two paddles or surfboards. The vacuum cups are strong enough since they have a ...
