

# Shanghai Hang Electric s photovoltaic inverter obtains European CE certification

Who are Longi & Shanghai Electric?

Consortia featuring subsidiaries of Chinese solar module maker Longi and Chinese industrial conglomerate Shanghai Electric have withdrawn from a public procurement tender for a solar park in Romania. The European Commission opened two anti-subsidy investigations into their involvement, which have now been closed.

Who is Shanghai Electric?

Shanghai Electric UK Co., Ltd. and Shanghai Electric Hong Kong International Engineering Co., Ltd. are leading global suppliers of industrial-grade solutions of energy, manufacturing and the integration of digital intelligence.

Did Longi and Shanghai Electric violate EU rules on foreign subsidies?

Longi and Shanghai Electric have withdrawn bids from a public procurement tender for a solar farm in Romania, bringing an end to two investigations into whether they had violated EU rules on foreign subsidies by participating in the process.

What is the global solar PV inverter market like in 2023?

Global solar PV inverter\*shipments grew by 56% in 2023 to 536 GWac, with China accounting for half of all shipments as the country's solar demand doubled in 2023, according to the latest analysis by Wood Mackenzie. The top 10 PV inverter vendors, led by Chinese giants Huawei and Sungrow, controlled 81% of the global market.

Who are Enevo group & LONGi Solar Technologie GmbH?

The opening of an in-depth investigation does not prejudice the outcome of the investigation. The first investigated consortium is composed of the ENEVO Group and LONGi Solar Technologie GmbH. ENEVO Group, the consortium leader, is a Romanian-based provider of engineering and consulting services.

Who owns the global PV inverter market?

The top 10 PV inverter vendors, led by Chinese giants Huawei and Sungrow, controlled 81% of the global market. Huawei and Sungrow alone captured over 50% of the global share, thanks largely to their popular utility-scale inverters, reports the market analyst.

Grid edge The interface where prosumers and consumers meet the intelligent grid. Technologies at the grid edge enable new opportunities for our energy systems. Digitalization, decentralization and decarbonization - ...

Trina Solar has announced that it has been awarded dual "Environmental Product Declaration" (EPD)

certifications from UL, the global independent safety science certification institute, and ...

UL Solutions" wide range of services for PV modules cover all types - crystalline, thin-film, building-integrated PV (BIPV), concentrator PV. We test and, as applicable, certify to: PV Module safety certification to UL 1703, the Standard for Standard ...

The doors of Europe are now open for the GoodWe MT-Series. The MT-Series is one of GoodWe's most successful and globalized inverters. For the past two years, the number of deployments of this inverter across the world has multiplied, contributing to raise the reputation of this inverter, which is considered, thanks to its outstanding DC oversizing of 50% and full ...

The paper presents the results of an experimental study of 26 brand new photovoltaic (PV) inverters widely available for sale on the EU market; the study was conducted in 2021 by researchers at ...

The European solar inverter market is set to grow from USD 2.85 billion in 2024 to USD 3.66 billion by 2029, with a growth rate of 5.06% annually. ... CE, IEC 62109, ... In 2023, the global shipment of solar PV inverters reached 536 GWac, with Chinese solar inverter manufacturers responsible for half of these shipments . Companies like Huawei ...

China Quality Certification Centre (CQC) is the first certification body authorized by the Chinese government to carry out green building materials product certification for PV modules and solar ...

There are multiple ways to ensure the safety of electrical equipment. Due to regulatory changes such as the RoHS III and the introduction of the new International Electrotechnical Commission (IEC) standard 62368-1, questions often arise when choosing a compliance route for electrical products. Here's what you should know about CE...

--Shanghai Electric announced that Nency Solar Technology Co., Ltd., the solar arm of Shanghai Electric, has been granted the IEC 61215: 2021 and IEC 61730: 2023 certifications for its...

Investor Eland Private Equity and Chinese manufacturer and EPC Shanghai Electric have set sights on Europe's thriving PV market, forming a new joint-venture which they ...

A product must be CE marked, when it is covered by one or more of the approximately 25 European Union technical regulations that require CE certification. These technical regulation are often called "directives" and sometimes "regulations". CE marking does not ...

The CE Marking Process Self-certification vs Third Party Certification There are two ways to obtain the mandatory CE marking: self-certification and third-party certification. Self-certification is applicable to low-risk products, where the manufacturer or importer affirms that the product meets the essential requirements of the directives.

Shanghai STEP Electric Corporation was established in 1995 by Mr JI DEFA, who is an elevator engineer. Through many years R& D and hard work, STEP now has more than 500 employees. We have successfully passed the ISO9001: 2000 Certification, the CE Certification, the German EN-81 Certification, the CSA Certification, China CCC and the ISO14000 Certification.

Enecsys claims that its 240W micro-inverters are the first to achieve UL certification without electrolytic capacitors. The photovoltaic (PV) micro-inverter is also certified for use in Europe ...

The European Commission said Wednesday it's investigating ENEVO Group including LONGi Solar Technologie GmbH, a unit of the world's second most valuable solar ...

The CE certification, which stands for "Conformit#233; Europ#233;enne" (European Conformity), is a mandatory conformity marking for products sold within the European Economic Area (EEA), which includes the European Union member states and some additional countries. It indicates that a product meets the essential health, safety, and environmental protection ...

The global energy landscape saw a significant shift in 2023, marked by a 56% increase in solar photovoltaic (PV) inverter shipments, to reach 536 GWac. China, a ...

Sineng Electric, a global leading PV+ESS solution provider, proudly announces that its flagship C& I PV product, the SN100(X)/110/125PT string inverter, has successfully obtained the VDE-AR-N 4110 and VDE-AR-N 4120 certificate from SGS, a prominent testing, inspection and certification company.
