

Solar Power Generation Rooftop Lease Agreement

What is the lease of roof space for panel installation?

The lease of roof space for panel installation is a relatively new development, triggered by government policies designed to encourage the generation of low-carbon energy.

Can I lease a roof space for PV panels?

Anyone considering agreeing to a lease of their roof space for fitting PV panels should be aware that most lenders' mortgage conditions will require the lender's consent to be obtained to any lease.

Do you need a lease for PV panels on a residential property?

This guidance provides information for photovoltaic (PV) panel providers and the public about lenders' minimum requirements with respect to consenting to a lease of roof space for the installation of PV panels ('the panels') on the roof of a residential property.

Should you rent a roof if you have a PV system?

As a result, in any rooftop lease agreement, you need to know who is going to pay if roof repairs are needed, especially if PV system removal is required. In simple terms, if maintenance is not an integral part of the lease agreement, roof rental is not likely to be a lucrative deal in the long run.

Should you rent out your roof space for a solar system?

Renting out your own roof space for the operation of a solar system offers the owner a lucrative secondary income stream. We operate the system and feed the electricity into the grid receiving a remuneration for the sale of energy. The roof owner can benefit by renting out his roof space without having to invest himself.

Can a landlord let a tenant install solar panels?

How amenable a landlord is to letting its roof space to a tenant for the purposes of installing solar panels, will depend on how much benefit the landlord is going to enjoy and the flexibility the landlord has itself to grant such an interest (for example the property may be charged or held on trust). In the past, the
