Comply with IEC 62446 Wiring Regulations for the identification and labelling of PV Systems with our range of PV Warning Labels.

Do PV systems need labels and warning signs?

Installers should consult the National Electricians Code (NEC) regarding PV systems and any local regulations from cities and municipalities. The basic parts of a PV system that need labels and warning signs include the following: Now that we know what needs labeling, we'll explore the PV labeling requirements that installers need to know.

What are warning labels & signs?

Warning labels and signs are among the most important aspects of installing solar photovoltaic (PV) systems. We'll break down the PV labeling requirements installers need to know to ensure the system complies with national electrical standards and is safe for use.

How do I choose a label for a solar system?

The labels and signs should be permanent and highly visible with contrasting colors to ensure the residents and maintenance or repair workers can find, read, and understand them. Consult the NEC to learn how big these labels and placards must be to comply. Get Solar Labels is the place to go if you need labels for a PV system.
