The goal of the Land Art Generator is to accelerate the transition to post-carbon economies by providing models of renewable energy infrastructure that add value to public space, inspire, and educate--while providing equitable power to homes around the world.

Are contemporary artists re-imagining solar energy as an art form?

In this post, I shift our focus to contemporary artists who are re-imagining solar energy as an art form. In particular, I am fascinated by those artists who, at the dawn of the Anthropocene, have adopted the ubiquitous rectangular blue solar photovoltaic (PV) panel as an artistic medium in and of itself. It was only a matter of time...

Who were the first artists to use solar panels as artistic canvas?

The Beam, Shala, and LAGI were the first to adopt solar panels as artistic canvas. I can't wait to see what the second wave will bring. Stay tuned. (Top image: Two solar panels created by Korean artist Choi, Jin-youn downloaded from The Beam website.)

What is solar panel art?

Berlin-based magazine The Beam, in collaboration with the Little Sun Foundation and Street Art Berlin, launched the Solar Panel Art Series in 2017, the first international art exhibit of painted solar PV panels. The Beam invited over 40 artists and designers from around the world to create works of art using recycled solar panels as their canvas.

Are solar panels a contemporary art form?

Things have, however, changed in recent years by some creative minds, through ground-breaking creative work and have given solar panels touch of their paintbrush. Re-imagining solar panels as a contemporary art form have taken strides since the concept of the Land Art Generator Initiative in 2008.
